

ISO 14001 Complete

Our ISO 14001 Complete package provides everything you need for your environmental management system (EMS), if you're looking to implement a brand new EMS or transition to the ISO 14001:2015 standard. The package contains an 'off-the-shelf' EMS and is stored within an online system that allows you to manage user access and document version history.

Save time and money

This package comes pre-populated with a comprehensive set of ISO 14001:2015 procedures and templates along with a management system index for you to use.

All you have to do is modify the documents to reflect the way your organisation operates. You will very quickly have all the documents you need for your EMS.

Reduce administration

The online system will manage all your documented information for you, ensuring safe storage and version control.

Flexible

The online system can also accommodate your existing management system documents. The system stores these in a series of organised folders, matching the ISO 14001 standard, making it simple to find the one you want.

Control access

You can control who is able to edit documents and who can only view them. The system is web-based and can be accessed anytime, from anywhere.

In the system, you can ensure that only the latest version of a document is visible to users, thus avoiding confusion and potential non-conformities.

Email and telephone support

The EMS consultants at Loreus will provide free support to help you implement your EMS and answer any questions you may have.

Achieve certification

Our ISO 14001 package will help you successfully achieve certification to ISO 14001:2015.

Detailed examples

Our package also provides you with detailed examples that you can follow, created by the expert EMS consultants at Loreus.

EMS training

We can also provide on-line courses to help train your staff.

Why choose the ISO 14001 Complete package ?

- It's the fastest way to implement an EMS to the ISO 14001:2015 standard.
- Reduce the administrative burden of operating your EMS.
- Simplify the operation of your EMS.
- It's a complete pre-made EMS that you can adapt to meet your needs.
- Telephone and email support is included at no extra cost.
- It comes with a free online introduction to the package.
- You will save a significant amount of time and money using this package.
- You can access your management system from anywhere in the world.
- We can provide online training courses on EMS implementation and operation as well as courses for EMS internal auditors and general environmental awareness.

To further support your EMS, Loreus also provides consultancy support and a suite of related e-learning courses. Visit www.loreus.com for further information.

What the package contains

All of the required ISO 14001:2015 documented information

The primary feature of the ISO 14001 Complete package is a collection of written documents which fulfil all requirements of the ISO 14001:2015 standard. This 'off-the-shelf' EMS will save you many hours of work, compared to creating all of the documents yourself. This package has been created by our team of practicing EMS consultants.

The package has been designed so that you can either edit the procedures to match processes currently used by your organisation, or adopt the processes described in each of the procedures.

Tried and tested

For over 15 years, Loreus has assisted organisations to successfully implement EMSs and gain third party certification, across a wide variety of sectors.

System folder structure

All of the documented information is organised according to a file structure which mimics the ISO 14001:2015 standard:

- Context of organisation
- Leadership
- Planning
- Support
- Operation
- Performance evaluation
- Improvement
- EMS manual
- Forms

Detailed examples

Included as part of the package are numerous detailed examples covering the practical aspects of implementing an EMS to the ISO 14001:2015 standard. A sample of these example documents are listed below:

- PESTLE analysis guidance and example
- Log of interested parties
- EMS management structure
- Environmental policy
- Environmental roles & responsibilities register
- Environmental aspects registers
- Compliance obligations register
- Sample operation control procedures
- Management review meeting agenda
- Complete audit checklist
- Evaluation of compliance checklist

All of the example documents have been created using the experience and best practice used by Loreus consultants, to provide you with an excellent starting point for meeting the standard's requirements.
